## ABSTRACT

Essay: 56 pages, 3 pics., 29 sources, 5 apps.

INTERNET TECHNOLOGIES, COMPUTER-BASED TECHNOLOGIES, FOREIGN LANGUAGE TEACHING, MOBILE APPLICATIONS, MOBILE TECHNOLOGIES, MOTIVATION, EDUCATION PROCESS EFFECTIVENESS

**Object:** raise of effectiveness of foreign language classes.

**Subject:** ways to use mobile applications, oriented at improvement of English teaching process.

**Aim:** to prove theoretically and develop a system of methods to use mobile applications during English classes.

**Survey methods:** comparative analysis, questionnaire, mathematical methods of analysis, observation.

**Survey and developments:** main aspects of effectiveness raise of the strategy of foreign languages teaching are studied, didactical possibilities of mobile applications are found, a system of methods to use mobile (internet) applications during English classes is worked out.

**Scientific novelty elements:** scientific approaches to effectiveness raise of the English classes based on the system of methods to use mobile applications are verified.

**Area of possible practical implementation:** foreign language classes at different educational institutions.

The author confirms, that the given calculations and analytical materials correctly and objectively reflect the state of the process under investigation, and that all theoretical, methodological and methodical positions and concepts borrowed from literature and other sources are accompanied by references to their authors.
