The desktop timer is specially designed for visually impaired and blind people. The timer is a tactile dial of white color.

Every 15 minutes are designated by three convex points; every 5 minutes - two convex points; every 2.5 minutes - one convex point.

In the center of the timer there is a large convenient relay for setting the time.

The size of the timer is 90x100 mm.

The diameter of the dial is 70 mm.

The maximum timer time is 60 minutes.

Type - mechanical

Multivariate with voice guide

Multivarka is designed for use by visually impaired and blind people. **The voice guide of the multivarker** sounds the setting of the settings, and indicates the readiness of the dish.

Characteristics

Volume of bowl - 5 l

Function "Masterchef"

Heating function

The "voice assistant" function

Choice of cooking temperature

The function of delayed start - up to 24 hours

Memorizing the last cooking time

Sound level indicator

The sound level indicator of the liquid prevents the transfer of hot water and other liquids through the edge of the cup during the preparation of the drink.

The yellow indicator can detect two different levels of liquid.

Intermittent sound signal and a series of vibrations indicate that the cup is almost full, and frequent sound signals and prolonged vibration signal that the liquid in the cup has already reached the limit level.

Suitable for both hot and cold liquids.

Equipped with two small magnets.

Talking lids for cans

Talking covers are a unique recording product designed to identify the contents of various cans or containers of food.

A yellow cover with a black button for playback makes it possible to record information for 20 seconds. Talking covers can be used several times, recording new information over an old one.

These covers can be attached to tin cans or covers (except those made of aluminum), as well as to ordinary containers or packages using a self-adhesive disc or a special strap that come with the kit.

Knife-doser

The design of the knife allows you to cut the products in the same even slices. The cutting thickness (up to 2 cm) is set by the resettable limiter. The knife blade made of high-grade steel has a two-sided grinding, making it universal.

Sharpening "wave" - for the main products.

Sharpening of the "saw" - for solid products, including frozen ones, as well as for cutting fish and poultry.

Sharpening is not required.

The length of the blade is 19 cm.

The width of the blade is 2.5 cm.

Kitchen scales with speech output

Kitchen scales with speech output. The weighing results are declared in a clear female voice in Russian. Also the weighing result is displayed on the digital display.

The scale has a flat platform, which allows you to weigh the products in the same container in which they will be prepared.

Specifications:

Permissible weight (volume): 1 g - 5000 g

Weighing units: grams (g), ounces (oz), pounds (lb), milliliters (ml).

Russian language.

The voice function can be turned on / off.

Overall dimensions: 165 x 205 x 20 mm.
