

Psychological correction of abnormalities

РЕПОЗИТОРИУМ БЕТУ

***Lecture 1: Methodological basics
of psychological correction of
emotional development of
personality***

**Psychocorrection (correctio) –
partial correction or change**

РЕПОЗИТОРИЙ БГПУ

Psychocorrection is a system of activities used for correcting disadvantages of psychological development or behaviour of a person with the help of special means of psychological influence

PSYCHOCORRECTION

- **clinically oriented** (it is basically used for alleviating and liquidating of the symptoms in question)

- **personality oriented** which strives for helping a person to change his attitude towards social environment

Specific features

It is oriented to :

- **a clinically healthy personality**
- **healthy sides of personality irrespective of degree of abnormalities**
- **medium-term assistance**
- **changing the behaviour and development of personality of a client**

Setting the goals

- optimization of social situation of development
- development of kinds of activity available for a child
- creation of psychological new formations corresponding to the age

The main tasks of correction

- correction of deviations in mental development on the basis of creating optimal conditions for emotional-personality and intellectual development of a child
- preventive measures of negative tendencies of personality and intellectual development
