# The structure of the plan of educational work of the detachment in the shift

- purpose, tasks.

- main directions of educational work.

- plan of events (name of the event, dates, venue, participants responsible for carrying out).

# Scheduling functions

- 1. A GUIDELINE RELATED** to the definition in the planning process of the scope, purpose and content of pedagogical activity, its subject, specific areas and types;
- 2. PREDICTIVE** - during the development of the plan, the pedagogical plan is realized, the bases of the detachment's life activity for the upcoming camp shift are modeled;

# Scheduling functions

3. **COORDINATING OR ORGANIZING**, allowing the counselor through reasonable and rational actions when planning to get a clear idea of the direction and content of the upcoming activities in accordance with the goals and objectives;
4. **THE CONTROL FUNCTION PROVIDES** the leader with the opportunity to control his path to the goal by using the plan;
5. **THE REPRODUCING FUNCTION** allows the plan to restore the content and volume of work performed even after some time has passed.

# Principles for successful planning (L.F. Voronkova)

## 1 ) Principles of pedagogical modeling:

- consistency;
- concreteness;
- optimality;
- dialogue;
- individuality;
- scientific;
- continuity.

## 2) Principles of educational work

# Stages of the plan:

**Stage 1.** Determination of the procedure and timing for developing a plan.

**Stage 2.** Modeling the image of the detachment and the process of educating its members (understanding common goals, determining educational tasks to replace, taking into account the age, the overall level of development of the children of the detachment, personal professional pedagogical position of the counselor, the basic means of achieving the goal).

**Stage 3.** Collective planning.

**4 stage.** Paperwork - work plan.
