Types of building material

Natural material

Types of building material

Auxiliary material

Tasks of teaching construction and construction games to children:

1. Expand children's understanding of work, builders, and construction tools.
2. Teach the ways of construction.
3. Develop independence, active thinking, constructive and creative abilities.

Methodical reception:

- Sample demonstration
- Showing construction methods with an explanation of construction techniques
- Statement of problem tasks
- A message about the construction topic indicating the conditions that it must meet
