Department of Special Pedagogy

Formation of dialogical speech at pupils with intellectual insufficiency

Associate Professor of the Department of Special Pedagogy, PhD in Pedagogy
Sviridovich I.A.
1. Features of the dialogical speech of pupils with intellectual insufficiency.

2. Formation of dialogical speech at pupils with intellectual insufficiency.
**Dialogue** (from the Greek, *dialogos* - conversation) is a prepared or unprepared conversation of the interlocutors.

Dialogue is a simpler form of speech, this is a situational speech.

The main feature of the dialogue is the alternation between the speaking of one interlocutor and the listening and subsequent speaking of the other.
The formation of dialogue requires the development of special complex skills

1. Actually speech (communicative skills):
   - to enter into communication;
   - to support and complete the dialogue;
   - speak expressively, at a normal pace, use intonation in the dialogue.
2. Skills of speech etiquette.
3. Ability to communicate in pairs, a group of 3-5 people in the team
4. Ability to communicate to plan joint actions, achieve results.
5. Non-verbal skills - facial expressions, gestures.
I. The development of reactive speech

*Types of work:*

- official dialogues;
- speech games;
- conversation based on life experience;
- construction of a response replica of the microdialogue;
- analysis of the communication situation based on the text of the dialogue.
II. Development of initiative speech

*Types of work:*

- recovery of a question by a known answer;
- a verbal description of the communication situation by a known replica;
- speech games;
- communication tasks in the form of learning and speech situations.
III. The development of coherent dialogic speech

**Types of work:**
- filling in dialogue schemes;
- compiling connected dialogues from individual replicas;
- conversation;
- building dialogues with pairs of students for a given situation;
- social role-playing games.
